AADITYA VERMA

Expert Engineer

aadityaverma1998@gmail.com | linkedin.com/in/aadityaverma | github.com/aaditya420 | aaditya420.github.io | Gurugram, Haryana, India

SUMMARY

Experienced Software Engineer (Generative AI & LLMs) with proven success shipping production AI systems and scaling AI literacy across large organisations. Delivered multiple end-to-end, compliant AI services (telephony summarisation, browser extension, conversational UI) and led cross-functional enablement programs. Strong track record in infrastructure (Terraform, AWS), data platforms (Snowflake, Neptune), and ML ops.

WORK EXPERIENCE

Fidelity International

Expert Engineer Feb 2026 - Present

- Implemented seamless OpenTelemetry (OTel) enablement for ECS applications across the organisation, improving observability and standardising telemetry ingestion pipelines.
- Built multiple agent skills to enhance developer experience: automated one-click developer setups, Terraform helper skills for code generation, and full application scaffolding skills.

Technical Specialist Oct 2025 - Feb 2026

- Owner, FILClientServicesGPT: architected AWS infrastructure, backend pipelines, Snowflake integration, and frontend UI to analyse 5,000+ repeated-caller calls/month.
- Technical lead for Freya (public conversational UI): defined architecture, secured approval, implemented RAG + feedback capture and drove production readiness.
- Delivered Wealth Management Genesys live-call summarisation PoC: integrated post-call transcript streaming into AWS and pushed results back to Genesys console.
- Led org-wide enablement and reliability efforts for FILBrowserGPT and extension tooling; ran fortnightly AI bootcamps to accelerate adoption.

Senior Analyst Programmer Aug 2023 - Oct 2025

- Scaled FILBrowserGPT to company-wide adoption: expanded features, added multi-model support, and managed deployment for stable org usage.
- Conducted GitHub Copilot Enterprise pilot: ran hands-on trials, documented security and workflow implications, collaborated with vendor engineers.
- Supported cross-team delivery work: productionising GAI applications, ensuring observability and auditability, promoting responsible AI practices.
- Implemented GAI based application for RRT Operations team using Terraform, AWS, React stack. Reduced workload by 75%.
- Implemented Knowledge Graph based solution for CoSec team using AWS Neptune, Terraform, Python backend and React UI.
- Implemented and researched fine-tuning of open source LLM models with domain data (tuned Falcon 7B for fintech datasets).

Analyst Programmer Aug 2022 - July 2023

- Development of FILxGPT, an internal GPT solution for Fidelity, delivering production value for multiple teams.
- Implemented GAI application for Client Services team to respond to Client Secure Messages, reducing manual collation time by 50%.
- Developed Knowledge Graph MVP for retrieving relevant IVR search results using AWS Neptune and Terraform.

Programmer Aug 2021 - July 2022

- Implemented Knowledge Graph-based application for retrieving most relevant search results for IVR clients on fund data queries.
- Automated Fund Data Management team workflow using spaCy for NER and PDF extraction.
- First position in Data Games (internal hackathon) for developing Charts Repository that improved research team productivity.

Graduate Programmer Aug 2020 - July 2021

- Development and maintenance of FIODE database.
- Implemented and updated PL/SQL procedures, improving data loading speeds by 20%.
- Automated data flow using Python scripts and Control-M jobs, saving 50% in manual efforts.
- Supported critical implementations for Fund Launches and Data Migration activities.

- Implemented Insights application for Central European marketing team to collate live news and sentiment data.

EDUCATION

The NorthCap University - B.Tech Computer Science

SKILLS

Terraform, AWS, Python, React, GAI, Docker, Kubernetes, Snowflake, SQL, PLSQL, MongoDB, Neptune (Graph DB), Knowledge Graphs, Stable Diffusion, Whisper, Chrome Extensions, DevOps, GitHub Actions.

ACHIEVEMENTS

Shipped four production-grade AI capabilities in 2025 and scaled AI literacy across the organisation. Multiple internal hackathon wins and measurable cost/time savings across projects.

VALUES & BEHAVIOURS

Integrity, Trust, Brave, Bold, Curious, Compassionate
